

EXPERIENCE THE POWER OF THE MICRO BUBBLES IN THE HOT TUB AND THE SURROUNDING AIR - PURE REJUVENATION!

A MicroSilk® bubble is approximately 50 to 100 times smaller than a typical hot tub bubble.

The bubbles created by a Marquis® hot tub with MicroSilk® are not only much smaller than regular hot tub bubbles, they are also negatively charged. Negatively charged ions are believed to increase serotonin production in humans, which is responsible for emotional stability, a sense of well-being and promotes restful sleep. They also help eliminate free radicals in the body which are known to cause cellular damage. This is part of the degenerative aging process which causes premature aging.

The oxygen levels with MicroSilk® are 70% higher than tap water. This correlates to a luxurious feeling, energizing skin cells, stimulating your immune system, killing bacteria and promoting healing.

You'll also experience the power

of the micro bubbles in the air surrounding the hot tub: Negatively charged anions improve serotonin levels, help relax your mind and body, promote deep sleep, enhance recovery from physical exhaustion.

Your MicroSilk® system will provide you a unique restorative beauty treatment...just as Marquis® water management system will restore your water to its pristine condition. Now prepare to renew your body and look years younger in a luxurious Marquis® hot tub with MicroSilk®. *The ultimate hot tub experience!*™

 **MARQUIS**
The ULTIMATE Hot Tub Experience!™

A MARQUIS® SPA WITH MICROSILK® IS LIKE BATHING IN A TUB OF WARM MILK – IT DRAWS OUT IMPURITIES & EXPOSES A NEW YOU!

Marquis® MicroSilk® beauty treatment moisturizes and hydrates at the same time making your skin feel luxuriously silky as well as reducing fine lines and wrinkles. Micro-bubbles literally envelope your body in a soothing, effervescent cloud of oxygen. Yes, oxygen is good for your skin. Increased oxygen levels result in better circulation and cellular respiration, which in turn leaves the skin glowing and radiant due to rapid skin cell regeneration.

With real, tangible effects, no surgery and no recovery time, there are many reasons MicroSilk® hydrotherapy is the anti-aging treatment of choice for the modern, sophisticated woman or man. Instead of invasive medical procedures, your

treatment happens as you soak away all the worries of the day in a luxurious Marquis® hot tub with MicroSilk®.

- Increased skin metabolism
- Enhanced skin cell growth
- Deeper cleansing of the pores to remove impurities
- Reduced fine lines and wrinkles
- Increased hydration
- Therapeutic levels of anions
- Neutralization of free radicals
- Relief from the symptoms of eczema and psoriasis

ONLY MARQUIS®' CONSTANTCLEAN™ WATER MANAGEMENT SYSTEM CAN RESTORE YOUR WATER TO PRISTINE!

The fact you experience this wellness with Marquis® is a major distinction. MicroSilk® technology has existed in the bath industry for several years. After each bath, all the water and the impurities drawn from the skin are washed down the drain. In a hot tub, how you clean and reuse the water rather than dumping out wasted water each use is very important to understand. The best filtration/sanitation system in the industry...Marquis®' proprietary ConstantClean™ water management with SmartClean™ technology...is the superior system that effectively and quickly restores your water back to pristine.

ConstantClean™ *only* exists with Marquis®. It is a

system built on High Flow filtration...moving the highest volumes of water through the most surface area of filter media in any brand of hot tubs.

The SmartClean™ software controls regularly scheduled clean up cycles and knows when you have used the hot tub and automatically triggers an additional cleanup cycle with all of the ConstantClean™ processes after your soak – a critical performance feature for clean water after MicroSilk® use...and only available with Marquis®: *The ultimate hot tub experience!™*

MicroSilk® is available on Epic, Euphoria, Promise 1 Pump, Resort, Spirit, V94L, V94, V77L 1 Pump, V65L.
