Unlimited Installation Options	Yes	No
Energy Efficient and Eco Friendly	Yes	No
Lifetime Non-Prorated Warranty	Yes	No
Warranty against Winter Damage	Yes	No
Still in use after 50 years	Yes	No

Incredible Engineering

Not All Pools are Created Equal!

When it comes to innovative engineering and superior structural integrity, it's what you don't see that counts! Engineered from technology developed for the NASA space program, Radiant Pools are the only structurally insulated swimming pools manufactured using an R-10 structural insulated panel – an industry first.

Our 2-inch thick wall panels are constructed of an EPS (expanded polystyrene) foam insulation core bonded between sheets of durable acrylic coated aluminum. The patented bonding process that joins the three layers creates a rigid wall that is far stronger and more durable than any other pool wall. Tested and proven for over 50 years!

Incredible Versatility

Aboveground, Inground and Everything in Between!

Today, residential lots offer many landscape challenges. With the superior wall construction of the Radiant Pool, you now have options! Radiant Metric Series Pools can be installed aboveground, inground, and semi-inground, on a slope or into a hill and no retaining wall required!

The Radiant Metric Series Pool fits any backyard, any budget, anywhere. No other pool offers you this type of versatility!

Incredible Insulation

Insulation Makes All the Difference!

Radiant Pools' R-10 insulated wall panels resist heat loss more efficiently than any other type of pool wall, maintaining water temperatures 5-10 degrees warmer. Radiant insulated wall panels help keep the water warmer longer so you can extend the swimming season by up to 2 months and save \$1000's on heating costs. Ask your dealer for all the Energy Savings details!

Incredible Warranty

With a Radiant Pool, you get true value and peace of mind!

Radiant Pools offers a **FULL LIFETIME, NON-PRORATED WARRANTY** against manufacturing defects for as long as you own your pool. And the warranty is **FULLY TRANSFERABLE!** If you should sell your Radiant pool, the lifetime warranty continues for the new owner. This valuable benefit can be an incredible selling tool for you!

The Metric Series warranty includes protection from winter damage! Snow and ice buildup can destroy a traditional aboveground pool. The incredibly strong Radiant pool wall eliminates this potential harm. Our warranty protects your pool in the unlikely event that damage occurs. No other pool warranty compares to Radiant Pools.

We're Shaping the Future of Backyard Pools!

Planning your next family vacation? Look no further than your own backyard! The Radiant Metric Pool gives you the versatility to design a backyard oasis that fits your style and budget! When you choose an incredible Radiant Metric Pool for your backyard, you will be swimming, entertaining and relaxing before you know it!

Aboveground

If you think all aboveground pools are created equal – Think again! Radiant Metric Pools come in 3 exciting shapes for you to choose from, including our unique Freeform pool. Explore your options for liner and wall pattern design to customize the look of your pool!

You can surround your Radiant Pool with a deck to create a poolside entertaining area. For a true backyard resort feel, add the **Radiant Inside Step**. This innovative liner over step adds a whole new dimension to your poolside pleasures providing a great gathering area for conversation and relaxation. Covered with a slip resistant textured liner for safety, it's perfect for loungers and little ones alike!

This exclusive step option provides you an easy access into and out of your aboveground pool that you can only get with a Radiant Metric Pool. The seamless design of the Radiant Inside Step complements the aesthetic appeal of your pool by creating an inground look in your Radiant Metric aboveground pool!

When an aboveground pool won't do, the possibilities are endless with a Radiant Metric Pool installed semi-inground.

Semi-Inground

A Radiant Metric Pool can be installed partially or all the way in the ground. Backyard on a hill? Sloped terrain is no longer a problem!

Halfway In and All Decked Out

In addition to the Round, Oval and Freeform, Radiant Pools also offers a classic Grecian shaped pool for semi-inground installation. At least 50% of the **Radiant Metric Grecian Pool** wall (26") must be installed below the ground. This pool gives you more options on installation and finishing! You can add a full deck to this amazing pool using 5/4 wood receptor coping. With this option, you get a clean finished edge, creating a smooth transition from deck to pool. Add a walk-in step or paver surround, and you can enjoy the look and feel of an inground pool for a fraction of the price.

Whatever your vision, Radiant Metric Semi-Inground Pools have varied shapes, sizes and installation options that allow it to comply with the requirements and restrictions of many homeowners associations regarding swimming pools. Now you can have the backyard you want in the neighborhood you choose!
